

WL 336HQ.RR

FD3

DORMANT

EXCEPTIONAL YIELD POTENTIAL WITH SUPERB WINTERHARDINESS

Satisfying the needs of shorter-season growers, WL 336HQ.RR combines solid yield potential with industry-leading winterhardiness, all backed with the “HQ” high-quality forage designation. WL 336HQ.RR is an ideal pick for dairy, beef, or cash hay growers looking to maximize profit potential while utilizing the Roundup Ready® weed control system in alfalfa.

WL 336HQ.RR Advantages

- Superb yield potential under 2-, 3- to 4-cut harvest management systems
- Quick regrowth in a FD3, that delivers potential for high yields and long stand life
- Very winterhardy (WH=1.0); WL 336HQ.RR delivers excellent cold tolerance even under harsh weather conditions
- The HQ brand is proven to “hold” forage quality over a longer period of time; WL 336HQ.RR supports higher forage quality and greater harvest flexibility when harvest is delayed
- An almost perfect disease resistance index (DRI) of 34/35 and strong resistance to insects and nematodes provide for solid yield potential and long stand life across a wide range of soil types and climates
- Dark green, fine-stemmed and highly digestible
- Improved salt tolerance of germinating seeds similar to tolerant check
- Outstanding winterhardiness allows intensive harvest management for maximum quality and yield potential without sacrificing stand life in Northern Plains, Upper Midwest, Northeast or Pacific Northwest regions

AGRONOMIC TRAITS

| | |
|--------------------------|-------------|
| Maturity | Medium |
| Fall Dormancy | 3.2 |
| Winterhardiness | 1.0 |
| Digestibility | Excellent |
| Recovery After Harvest | Very Fast |
| Standability | Excellent |
| Traffic Tolerance | Very Good |
| Multileaf Expression | High |
| Disease Resistance Index | 34/35 |
| Salt Tolerance | Germination |

PEST RESISTANCE TRAITS

| | |
|-------------------------------|----|
| Bacterial Wilt | HR |
| Fusarium Wilt | HR |
| Verticillium Wilt | HR |
| Anthracnose | HR |
| Phytophthora Root Rot | HR |
| Aphanomyces Root Rot (Race 1) | HR |
| Aphanomyces Root Rot (Race 2) | R |
| Leaf Disease | R |
| Pea Aphid | HR |
| Spotted Alfalfa Aphid | R |
| Stem Nematode | MR |

HR = HIGH RESISTANCE R = RESISTANT MR = MODERATE RESISTANCE

Planting WL 336HQ.RR alfalfa and utilizing the Roundup Ready® weed control system provides many benefits over conventional herbicide programs

- Weed control at both stand establishment and in established stands means fewer weeds and higher quality hay and haylage, which can result in more milk and beef per acre
- Optimal crop safety at all growth stages provides increased yield potential in both the establishment and subsequent years
- The simplicity of using a single herbicide (Roundup®) provides optimal weed control with no need to tank-mix; one herbicide does it all
- Flexibility in timing of application allows growers to spray when necessary; minimal carryover or crop rotation limitations
- Minimal wait (5 days) after Roundup® application before haying/feeding

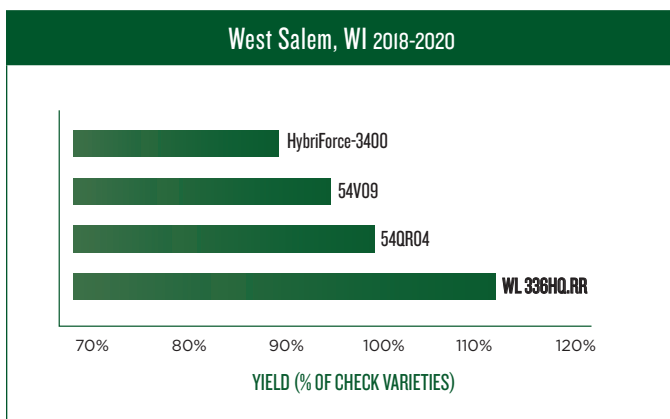

WL 336HQ.RR Forage Quality Analysis*

| Variety | CP | % IVTD | RFQ |
|--------------------|-------------|-------------|------------|
| WL 336HQ.RR | 21.0 | 77.0 | 159 |
| HybriForce-2400 | 19.9 | 74.7 | 144 |
| Attention II | 20.3 | 74.8 | 152 |
| 54HII | 20.1 | 73.9 | 136 |

CP= Crude Protein IVTD = In Vitro True Digestibility RFQ = Relative Forage Quality
