

# WL 356HQ.RR

FD4

DORMANT

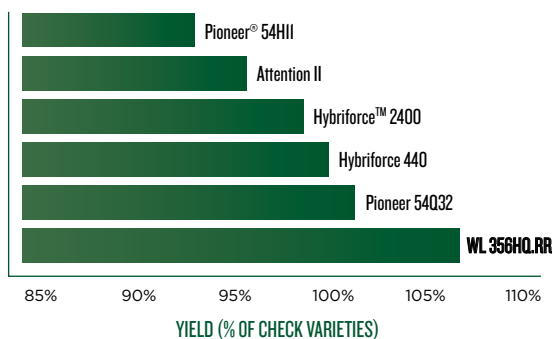

## OUTSTANDING YIELD POTENTIAL AND FORAGE QUALITY

With Powerful Protection on Your Toughest Soils

### WL 356HQ.RR Advantages

- Very high yield potential under 3- to 5-cut harvest managements
- Unique wet soil disease resistance package (HR to Aphanomyces Race 2) promoting better stand establishment, persistence, and forage yield potential
- WL 356HQ.RR carries the "HQ" designation, exhibiting strong potential to deliver optimal feed intake, milk production, and profit potential when fed
- Very winterhardy (WH=1.6); WL 356HQ.RR delivers long stand life under adverse weather and soil conditions
- Highly resistant (HR) to stem nematode
- Perfect Disease Resistance Index (DRI) of 35/35 supports fast seedling establishment and long stand life
- Ideal FD4 variety for Midwest, Northern Plains, Pacific Northwest and Northeastern region of the U.S. for hay and haylage uses
- Salt tolerance of germinating seeds similar to resistant check

West Salem, WI 2010-2011\*

\* Results are based on controlled field trials at the listed W-L Alfalfas location. Results may vary and are dependent on factors outside of W-L Alfalfas's control, such as weather. Yield, profit and other results cannot be predicted or guaranteed by W-L Alfalfas.

### AGRONOMIC TRAITS

Maturity	Early
Fall Dormancy	3.8
Winterhardiness	1.6
Digestibility/Feed Value	Superior
Recovery After Harvest	Very Fast
Standability	Excellent
Traffic Tolerance	Very Good
Multileaf Expression	Very High
Disease Resistance Index	35/35
Salt Tolerance	Germination

### PEST RESISTANCE TRAITS

Bacterial Wilt	HR
Fusarium Wilt	HR
Verticillium Wilt	HR
Anthracnose (Race I)	HR
Phytophthora Root Rot	HR
Aphanomyces Root Rot (Race 1)	HR
Aphanomyces Root Rot (Race 2)	HR
Spotted Alfalfa Aphid	MR
Pea Aphid	R
Stem Nematode	HR

HR = HIGH RESISTANCE R = RESISTANT MR = MODERATE RESISTANCE

■ Area of Primary Adaptation

## Planting WL 356HQ.RR utilizing the Roundup Ready® weed control system provides many benefits over conventional herbicide programs

- Exceptional weed control at both stand establishment and in established stands means fewer weeds and higher-quality hay and haylage, which can result in more milk per ton fed and higher RFQ when tested
- Optimal crop safety at all growth stages with the Roundup Ready® weed control system delivers increased yield potential in both the establishment year and subsequent years
- The simplicity of using a single herbicide (Roundup®) provides optimal weed control with no need to tank mix
- Flexibility in timing of application allows growers utilizing the Roundup Ready® system to spray when necessary; no carryover or crop rotation limitations
- Minimal wait (5 days) after Roundup® application before haying/feeding

## WL 356HQ.RR Continues the “HQ” Tradition of Elite Forage Quality\* Boone, IA 2011

Variety	CP	IVTD	RFQ
<b>WL 356HQ.RR</b>	<b>22.9</b>	<b>81.7</b>	<b>202</b>
Pioneer® 53Q30	21.4	79.1	187
HybriForce™ 440	21.6	79.9	186
DKA 43-13	20.8	76.7	172

CP = Crude Protein IVTD = In Vitro True Digestibility RFQ = Relative Forage Quality

## Do You Need Dual-Race Aphanomyces Root Rot Resistance?

The Aphanomyces fungus prunes alfalfa roots, resulting in stunted, chlorotic plants and poor seedling establishment on wet soils. Most alfalfa varieties currently marketed in the U.S. are resistant to Race 1 Aphanomyces, but far fewer varieties are resistant to Race 2.

Race 2 Aphanomyces isolates are widespread and cause severe disease on Race 1-resistant varieties. University forage specialists throughout the Midwest and Northeast suggest that Race 2 Aphanomyces represents a widespread risk to alfalfa varieties that possess only Race 1 Aphanomyces resistance.

Planting alfalfa with high resistance to Race 2 Aphanomyces (WL 356HQ.RR, left) will significantly improve alfalfa stand establishment and productivity on heavy or poorly drained soils where root diseases are prevalent.

\* Results are based on controlled field trials at the listed W-L Alfalfas location. Results may vary and are dependent on factors outside of W-L Alfalfa's control, such as weather. Yield, profit and other results cannot be predicted or guaranteed by W-L Alfalfas.
