

WL 535HQ

FD8

NON-DORMANT

A YIELD POTENTIAL LEADER

Broadly adapted across the entire southwestern U.S. where non-dormant alfalfas are grown. WL535 HQ has delivered outstanding persistence and long stand life under intensive harvest managements, providing producers with a valuable tool to increase both production and profit potential.

WL 535HQ Advantages

- Winter-active, non-dormant FD=8.2
- Very high yield potential across a wide range of soil types and harvest schedules
- Highly resistant to all major aphid pests
- Resistant to all major nematode pests
- WL 535HQ is highly palatable; optimizes intake, milk production, and can help lower feed costs and increase profit potential
- Ideal variety for the cash hay producer: WL 535HQ promotes high yield potential of leafy, fine-stemmed hay with high feed value and dark green color
- Outstanding persistence and long stand life even under intensive cutting schedules
- Very strong disease resistance package (including HR to Phytophthora Root Rot, Fusarium Wilt, and Verticillium Wilt) promotes fast stand establishment and longer stand life
- Excellent tolerance to leaf diseases provides improved leaf retention, higher protein levels, and greater forage quality
- Very fast recovery after cutting

AGRONOMIC TRAITS

Fall Dormancy	8.2
Winter Activity	High
Digestibility/Feed Value	Superior
Persistence Index	Very High
Aphid Resistance Index	15/15
Recovery After Harvest	Very Fast
Standability	Excellent
Traffic Tolerance	Very Good
Leaf Type	Trifoliolate

PEST RESISTANCE TRAITS

Fusarium Wilt	HR
Verticillium Wilt	HR
Pea Aphid	HR
Blue Alfalfa Aphid	HR
Spotted Alfalfa Aphid	HR
Phytophthora Root Rot	HR
Stem Nematode	R
Root Knot Nematode (Southern)	R

HR = HIGH RESISTANCE R = RESISTANT

WL 535HQ Delivers

WL 535HQ can deliver big yield potential, exceptional feed value, and outstanding profit potential for both dairy and cash hay producers. WL 535HQ carries on the great HQ tradition set by WL 525HQ. Intense selection for parent plants with high forage quality traits (high % crude protein, excellent fiber digestibility) has resulted in an HQ alfalfa variety with superior hay quality. High forage yield potential plus exceptional feed value can equal greater profit potential, and WL 535HQ delivers.

For more information visit wresearch.com. In the following states, purchase and use of HarvXtra® Alfalfa with Roundup Ready® Technology is subject to a Seed and Feed Use Agreement, requiring that products of this technology can only be used on farm or otherwise be used in the United States: Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington and Wyoming. In addition, due to the unique cropping practices do not plant HarvXtra® Alfalfa with Roundup Ready® Technology and Roundup Ready® Alfalfa in Imperial County, California, pending import approval and until Forage Genetics International, LLC (FGI) grants express permission for such planting.

Forage Genetics International, LLC ("FGI") is a member of Excellence Through Stewardship® (ETS). FGI products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with FGI's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. As of June 2017, HarvXtra® Alfalfa with Roundup Ready® Technology and Roundup Ready® Alfalfa have pending import approvals. GROWERS MUST DIRECT ANY PRODUCT PRODUCED FROM HARVXTRA® ALFALFA WITH ROUNDUP READY® TECHNOLOGY SEED OR CROPS (INCLUDING HAY AND HAY PRODUCTS) ONLY TO UNITED STATES DOMESTIC USE. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Growers should refer to <http://www.biotradestatus.com/> for any updated information on import country approvals. Excellence Through Stewardship® is a registered trademark of Biotechnology Industry Organization.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® crops contain genes that confer tolerance to glyphosate. Glyphosate herbicides will kill crops that are not tolerant to glyphosate.
