

WL 336HQ.RR

FD3

DORMANT

EXCEPTIONAL YIELD POTENTIAL WITH SUPERB WINTERHARDINESS

Satisfying the needs of shorter-season growers, WL 336HQ.RR combines solid yield potential with industry-leading winterhardiness, all backed with the “HQ” high-quality forage designation. WL 336HQ.RR is an ideal pick for dairy, beef, or cash hay growers looking to maximize profit potential while utilizing the Roundup Ready® weed control system in alfalfa.

WL 336HQ.RR Advantages

- Superb yield potential under 2-, 3- to 4-cut harvest management systems
- Quick regrowth in a FD3, that delivers potential for high yields and long stand life
- Very winterhardy (WH=1.0); WL 336HQ.RR delivers excellent cold tolerance even under harsh weather conditions
- The HQ brand is proven to “hold” forage quality over a longer period of time; WL 336HQ.RR supports higher forage quality and greater harvest flexibility when harvest is delayed
- An almost perfect disease resistance index (DRI) of 34/35 and strong resistance to insects and nematodes provide for solid yield potential and long stand life across a wide range of soil types and climates
- Dark green, fine-stemmed and highly digestible
- Improved salt tolerance of germinating seeds similar to tolerant check
- Outstanding winterhardiness allows intensive harvest management for maximum quality and yield potential without sacrificing stand life in Northern Plains, Upper Midwest, Northeast or Pacific Northwest regions

HQ™

Roundup Ready®
ALFALFA

AGRONOMIC TRAITS

Maturity	Medium
Fall Dormancy	3.2
Winterhardiness	1.0
Digestibility	Excellent
Recovery After Harvest	Very Fast
Standability	Excellent
Traffic Tolerance	Very Good
Multileaf Expression	High
Disease Resistance Index	34/35
Salt Tolerance	Germination

PEST RESISTANCE TRAITS

Bacterial Wilt	HR
Fusarium Wilt	HR
Verticillium Wilt	HR
Anthracocone	HR
Phytophthora Root Rot	HR
Aphanomyces Root Rot (Race 1)	HR
Aphanomyces Root Rot (Race 2)	R
Leaf Disease	R
Pea Aphid	HR
Spotted Alfalfa Aphid	R
Stem Nematode	MR

HR = HIGH RESISTANCE R = RESISTANT MR = MODERATE RESISTANCE

■ Area of Primary Adaptation

Planting WL 336HQ.RR alfalfa and utilizing the Roundup Ready® weed control system provides many benefits over conventional herbicide programs

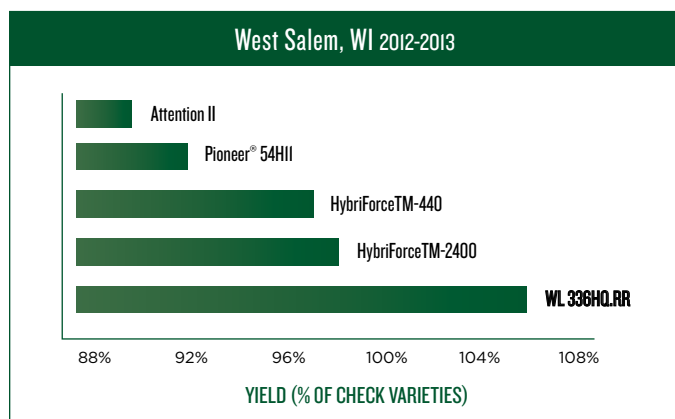

- Weed control at both stand establishment and in established stands means fewer weeds and higher quality hay and haylage, which can result in more milk and beef per acre
- Optimal crop safety at all growth stages provides increased yield potential in both the establishment and subsequent years
- The simplicity of using a single herbicide (Roundup®) provides optimal weed control with no need to tank-mix; one herbicide does it all
- Flexibility in timing of application allows growers to spray when necessary; no carryover or crop rotation limitations
- Minimal wait (5 days) after Roundup® application before haying/feeding

WL 336HQ.RR Forage Quality Analysis*

Variety	Crude Protein	% In Vitro True Digestibility	Relative Forage Quality
WL 336HQ.RR	21.0	77.0	159
HybriForce-2400	19.9	74.7	144
Attention II	20.3	74.8	152
54HII	20.1	73.9	136
