FD 8.0

NON-DORMANT

INCREDIBLE YIELD POTENTIAL BACKED BY SUPERB FORAGE QUALITY

WL 558HQ.RR results from five years of intense forward breeding from WL 552HQ.RR with the focus on additional high yield potential, persistence, forage quality and increased pest resistance.

WL 558HQ.RR Advantages

- WL 558HQ.RR is a winter-active, non-dormant FD=8.0
- An ideal non-dormant variety for the cash hay producer, WL 558HQ.RR produces big yield potential of leafy, fine-stemmed hay with dark green color and high feed value
- With an improved disease resistance package (including HR to Phytophthora Root Rot, Fusarium Wilt, Bacterial Wilt, Spotted Alfalfa Aphid and Pea Aphid and R to Anthracnose) it promotes fast seedling establishment and long stand life
- WL 558HQ.RR has excellent tolerance to leaf diseases, promotes improved leaf retention, higher protein levels, and greater forage quality

■ Area of Primary Adaptation

Planting WL 558HQ.RR utilizing the Roundup Ready® weed control system provides many benefits over conventional herbicide programs

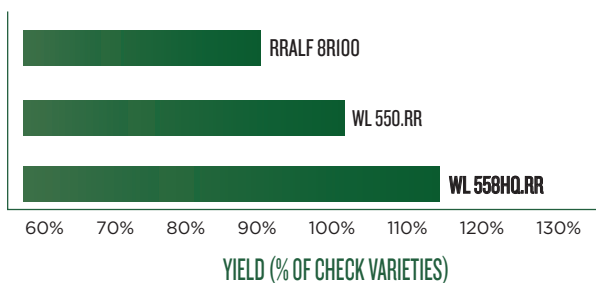

- Unmatched weed control when establishing new stands and in established stands can mean fewer weeds and higher-quality hay, which can result in higher forage quality and greater profit potential
- Superior crop safety at all growth stages with the Roundup Ready® weed control system means thicker stands and higher yields for the life of the stand
- Flexibility in timing herbicide applications allows alfalfa producers utilizing the Roundup Ready® system to spray when necessary; no carryover or crop rotation limitations
- There is minimal wait (5 days) after a Roundup® application before haying/feeding
